How do the layers of the Eclypse® dressings work?

The backing
The water-resistant barrier backing on Eclypse® dressings are bacteria and viral proof and critically prevent strike-through.

Secondary layer
This layer sits underneath the backing and on top of the moisture locking layer.

Moisture locking layer
The central layer of the Eclypse® dressing consists of a sheet of highly absorbent crystals and a mechanically bonded cellulose pad.

Rapid wicking layer
This layer draws up the exudate from the wound bed delivering the exudate into the moisture lock layer.

Soft silicone contact layer
The silicone contact layer gently adheres to skin but due to the hydrophobic nature of silicone it will not adhere to the wound bed.

Manufactured in our state-of-the-art facility in the UK, our range of Eclypse® super absorbent dressings deliver quality performance in the controlled management of exudate. Our recent developments in the Eclypse® range of dressings have seen an increase in the absorbency of our products by 30%, with no impact on cost.

Eclypse Adherent®
Super absorbent dressing with soft silicone contact layer

Super absorbent dressing with a self adhesive soft silicone contact layer. The soft silicone layer provides gentle adherence and will facilitate atraumatic removal. Eclypse Adherent® is the only super absorbent dressing that features trauma-free silicone technology.

The silicone contact layer does not damage the surrounding skin, peri-wound area or newly formed tissue and will not adhere to the moist wound bed. Eclypse Adherent® can be easily lifted for adjustment without losing its adherent properties.

- Unique atraumatic wound contact layer combined with high absorbency
- Silicone adhesive enables single handed dressing application
- Minimizes trauma and pain upon dressing removal
- Market leading range of sizes

Eclypse Adherent Sacral®
Super absorbent sacral dressing

Super absorbent wound dressing featuring a soft silicone contact layer designed specifically for the sacral area.

The sacral area is a notoriously difficult area to dress with the combined requirements for absorbency, security and comfort.

The Eclypse Adherent Sacral® dressing has been specifically designed to meet these needs and is a major advancement in the management of sacral pressure ulcers.

- Unique atraumatic wound contact layer combined with high absorbency
- Anatomically designed shape
- Low profile round dressing edges prevent dressing lift
- Silicone adhesive enables single handed dressing application
- Available in two sizes
