How do the layers of the Eclypse® dressings work?

The backing
The water-resistant barrier backing on Eclypse® dressings are bacteria and viral proof and critically prevent strike-through.

Secondary layer
This layer sits underneath the backing and on top of the moisture locking layer.

Moisture locking layer
The central layer of the Eclypse® dressing consists of a sheet of highly absorbent crystals and a mechanically bonded cellulose pad.

Rapid wicking layer
This layer draws up the exudate from the wound bed delivering the exudate into the moisture lock layer.

Soft silicone contact layer
The silicone contact layer gently adheres to skin but due to the hydrophobic nature of silicone it will not adhere to the wound bed.

Manufactured in our state-of-the-art facility in the UK, our range of Eclypse® super absorbent dressings deliver quality performance in the controlled management of exudate. Our recent developments in the Eclypse® range of dressings have seen an increase in the absorbency of our products by 30%, with no impact on cost.

Eclypse Boot®
Super absorbent leg wrap dressing

A unique clinical solution to assist in the management of excess fluid often associated with lower leg oedema.

Eclypse Boot® is a super absorbent dressing specifically designed to manage high levels of fluid in the lower limb.

The preshaped design overcomes the traditional time-wasting complexities of dressing ‘leaky legs’ with a combination of dressings that are often bulky and restrict patient mobility.

- Anatomically designed to fit the lower limb and foot
- 12 Super absorbent interconnected compartments to optimize absorbency
- Highly conformable
- Significantly improves patient mobility
- Easy to apply, single dressing design
- Reduce dressing application time
- Available in three sizes

Eclypse Foot®
Super absorbent foot wrap dressing

A super absorbent dressing, designed to be applied securely around the foot area to manage wound exudate.

The dressing utilizes the high fluid handling capabilities of the Eclypse® range in a preshaped dressing designed to fit comfortably and effectively around the foot. Its is easy and simple to apply and offers enhanced patient comfort.

- Rapid absorption
- High capacity
- Fluid repellent backing
- Strength and durability
- Stay dry technology
- Thin and conforming
- Particularly useful in issues related to the treatment of the diabetic foot
